

**Hello! Welcome to SHARE's October Vacation Care program.**

**A few things to remember:**

- \*On at-home days, your child may have the opportunity to go on short excursions to the summer hill village area, for example to gather ingredients for a cooking activity. They will always be fully supervised and accompanied by an appropriate ratio of educators.**
- \*The excursion to Ninja Parc on the 30<sup>th</sup> requires a waiver. Please check the link in the description to make sure you sign it so your child can play on the day.**
- \*Enrolments will be open until September 22. After that date we can't guarantee care, so please try and book before then.**
- \*The numbers for some excursions are capped, so get in early to get your spot.**
- \*Pay attention to the leaving times for the excursion days so you don't miss the bus.**
- \*SHARE provides breakfast and afternoon tea, but you need to make sure your child has morning tea and lunch.**
- \*On non-excursion days you can order lunch and we will pick it up from the local shops. Menus will be at the door and the cost will be added to your fees.**
- \*SHARE will provide red hats for outside play and rash vests for water excursions. All children will need to wear the rash vests when we go to the beach. SHARE also provides sunscreen, but children are welcome to bring their own if they prefer.**
- \*We do a lot of outside play and walking, so make sure your child has suitable footwear.**

**Let us know if you have any questions or ideas!**

### **Sustainable Shelters**

1.30 PM

This incursion emphasises sustainability by blending up-cycling techniques and bushcraft skills, empowering children to undertake new projects using natural materials and repurposed, found, or discarded items.

By utilising natural materials, kids learn about the useful properties of various plants, trees, and minerals still relevant today. Up-cycling found objects offers them a perspective on our throw-away culture, encouraging them to think about using existing resources instead of generating new waste.

Teamwork is a key component, as children work in small groups to design, problem-solve, and build shelters using a combination of natural and recycled materials.
